**COLLECTION**

LADIES & GENTLEMEN STUDIO

ABOUT THE COLLECTION

L&G believes that thoughtful pairings of form, function, and materiality can enrich spatial experiences in unexpected ways. In this spirit, their furniture and lighting collection features simple statement pieces intended to quietly add sophistication , utility and playfulness to an interior.

L&G’s open and collaborative design approach provides clients with three levels of service depending on the needs of their project:

Standard -

Select items from L&G’s collection, thoughtfully composed for optimal pairings of form, fit, and finish.

Tailored -

All standard products can be adapted in a variety of ways. L&G works with clients to create finishes, sizes, and configurations of standard products to complement the character of a space.

Commissioned -

L&G collaborates directly with clients to create original site-specific work. From large scale to small, projects are enriched when L&G’s design perspective and creative solutions are combined with a deep understanding of the project’s parameters.

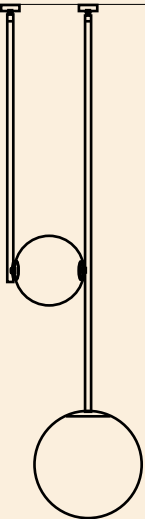

ABOUT L&G STUDIO

L&G Studio’s aesthetic and design philosophy is a balanced blend of warm minimalism, playful austerity, and simple sophistication. Founded by Dylan Davis & Jean Lee in 2010, L&G Studio’s playful explorations in materiality blend their resourceful curiosity with the desire to find unexpected pairings of material and function. Their focus is on creating a diverse set of products from small objects, home decor goods, jewelry, to furniture, lighting, and beyond. Their open, multidisciplinary approach to design yields an unexpected, ever-evolving set of ideas and experiments collected from their everyday discoveries, explorations, and surroundings.

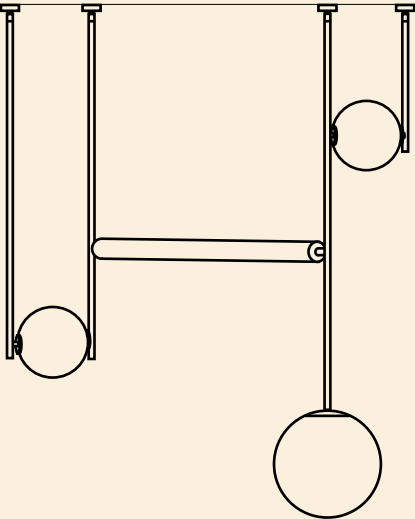

# EQUALIZER COLLECTION

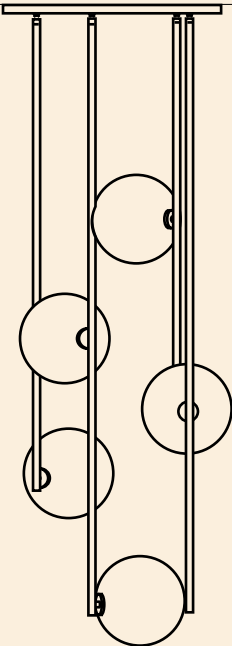

2 piece

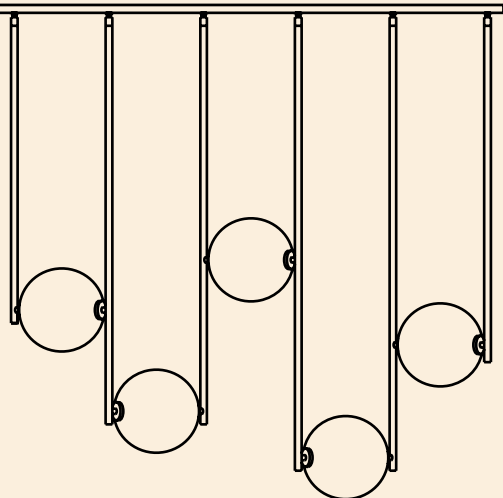

4 piece

5 piece  
radial

5 piece  
linear

A flexible lighting system designed to delineate interiors through positive and negative space. Equalizer's undulating framework is inspired by folding metal room dividers, mechanisms for spatial definition without solid walls. This framework is pierced by a network of illuminated glass shades handblown by John Hogan. The resulting compositions are modular statements that are custom configured according to specific spatial needs.

Equalizer is configured and made to order by  
Ladies & Gentlemen Studio.
